**INVENTION**

**Please rewrite the paragraph on page 16, lines 4-10 as follows:**

In the aforementioned method for producing a semiconductive glaze product of the present invention, while raw materials—which ~~contains~~ contain large particles—are mixed together, the particle size of raw materials is reduced through milling so that the raw materials have a predetermined particle size. However, when raw materials which have been reduced in size beforehand are available, needless to say, a desired glaze product can be produced merely by mixing the raw materials.
